

Our Earth

By: Azwad Akif

Earth is a beautiful place,
Full of natural treasures,
Water, vegetables, fruit, and flowers
These are all examples of nature's pleasures

Our Earth is a living place just like us,
Beautiful and strong,
With hundreds of different colors and objects,
That could make a beautiful song

But this Earth we live on is becoming damaged,
There is too much trash and waste,
This Earth we need,
Is filled with broken dolls, damaged hair combs, and
expired food pastes

We can try to stop wasting our trash,
We can put it to good use,
We can recycle, reduce, and reuse,
Because if we don't, our beautiful Earth will be gone
