

Name: Brayden Bango

---

Hi, I am Brayden Bango. I go to Hermon Dekalb Central School. I live in Dekalb Junction, New York. Recycling is important to me because it is good for the environment.

I think we can build a machine to make a toy car out of metal, bottles, and scraps. The machine will have gears, three parts, one is a truck, two is a van, and three is a car. For this machine, I need a battery pack, two batteries, a box, a motor, on and off switch bottles caps. If you build a bottle car you will need a battery pack, two batteries, a bottle, a motor, on and off switch, bottle caps. I am going to put it together with hot glue and velcro.

The birds can eat the plastic and cardboard; it will kill them to extinction just like the Dodo Birds. The trash will not go to the landfill, it won't kill the birds. You will have fun with the car.

In conclusion, The birds won't die from the trash. I hope you like my ideas. The car will be fun. They are good and fun.
