

Earth Day

Axel Kellershon

This year Earth Day will be on April 22nd. On Earth Day and everyday you should try to do something with the three R's.

Reduce

Reduce means to use something less. For example, don't use as much water by turning off the water when you brush your teeth. Another way to Reduce is to turn off the lights when you don't need them, and don't cut down trees.

Reuse

Reuse means to use something more than once. A way to reuse is to reuse water bottles, another way to reuse is to have a yard sale when you have toys you

don't use. Last of all, don't use plastic bags, use reusable bags.

Recycle

Recycling is the process of converting waste materials into new materials and objects. A way to recycle is to clean up the beach and pick up water bottles and you can recycle them and then they can be turned back into a water bottle. Another way to recycle is make sure your paper & plastic goes in the right bin, otherwise it will go with the garbage.
