

Earth day

Written by. Sheily Catalan

I think that Everyone should take a lot of responsibility and help make the earth a better place. People could start by driving or walking to beaches and playgrounds and help find any trash and clean it up. You could also start with recycling and separating plastic

from cardboard. You should really care for the environment so no animals and nature because this is the only planet that has

everything you need like life, food and drinks and oxygen. The earth is very important to many species. Everyone should give a helping hand to keep everyone and everything safe. That's why I think that everyone should help the earth, Thanks you!
