

# Earth Day

By Olivia Rue

Earth Day is coming up and here are some ways you can help the Earth. Earth Day is about helping the environment. I like Earth Day because I go pick up trash, plant trees, and recycle. All these things are good for the Earth.

The first way to help the environment is by picking up trash. You could go to a park and pick up trash. You can also volunteer to pick up trash around your neighborhood. Finally, you can put up signs saying "Don't Litter". Picking up trash is a great way to spend Earth Day.

Planting trees is another great way to help the environment. The reason is because they give us oxygen. Also, they are very beautiful. That is why you should plant trees.

Finally, recycling is another tool to save the environment. You can recycle all sorts of things. You can recycle water bottles, paper, and plastic. By doing this our Earth will be way cleaner.

Those are some ways to help our Earth. So go ahead and help our Earth by doing some of these things. they will help our Earth be a lot happier. Happy Earth Day!
