

EARTH DAY!!!!!!!!!!

By Lulu

Earth Day is very important. I think at least one person can do one thing for the Earth. What can you do for the Earth? The things I can do are :

1. Plant trees
2. Bike more instead of drive
3. Recycle more.

There are many things you can plant. Like..... Flowers,trees, and bushes. I would probably plant flowers. I would plant flowers because they are easy, safe, and smell amazing. But bushes and trees are just as important as flowers. What will you plant?

The second thing is it's awesome to bike instead of drive when you can. It's great to do that because It's good for you, and it doesn't contain any oils or gases

and it's tons of fun. Everyone can do that, why dont you try?

The last thing I can do for the Earth is recycle. It's so, so easy. There are only some things you can recycle. Those things are paper, bottles, and plastic. I recycle all those things.

Guess what? You can do these things and more everyday! Not just on Earth Day. I do all these things everyday. How about you? Thanks so much for reading!
