

Earth Day Essay

By: Maya Daniel

Earth Day means to save the planet from pollution and garbage. That means to reduce, reuse, recycle. Reuse means to reuse something over and over again. Like Plastic bottles, Egg Cartons or plastic food containers. Reduce means to use less of something (not to waste). For example, You can use less water. When you brush your teeth, you have the water running. Turn off the faucet so you are not wasting water. Recycling means to take trash and turn it into new products. You can recycle Water Bottles, Cans and Glass. It is why we celebrate Earth Day.
