

Earth Day Haiku
By Kevin Zang

The earth was once great
with birds and trees and beauty
beautiful, it was

with greenery too
but now we have changed it all
burning oil, coal,

destroying the planet,
plastic killing animals
deforestation

but wait, don't despair,
we can make things right. Come back,
we can make things right

start recycling
and help clean up plastic and
use green energy.

Keep it on, and the
earth will be beauty again
or we will All DIE.
