

Name Gracie B

If we
don't

If we
do the three R's!

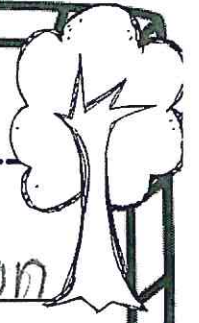

How I can help the Earth.

To help the Earth I can
pick up trash in my neighborhood
use less water, heat, light and
most of all we can Reduce,
Reuse, and Recycle!

What I don't like:
I don't like the water rising
because it can flood buildings -

Name Gracie

and homes also most vacation trip are on beaches and oceans where the ice is rising.

How I can fix the problem: #1 we should stop pouring dirty water and trash into lakes and oceans #2 we should put a wall up on the shoreline until the water starts going down to prevent floods. Also I think garbage trucks should have tops. Most of the garbage we see is from garbage falling out. That's how I would help the world.
