

EARTH DAY

BY OLIVIA

Have you ever heard about Earth Day, well I have. A few reasons to help Earth Day are to pick up trash, riding bikes, and plant trees. Also those are all good for the environment.

Picking up trash is good for the environment. When you pick up trash you save people and animals. You can then recycle and reuse the paper you pick up. You can help by reusing things, which is good. That is why you should pick up trash.

Planting trees is very good for the Earth. They give you oxygen, and are beautiful. When people cut them down it is not great for the environment. It is better to plant trees than destroy them.

Gasoline is bad for the environment. It can make you sick. It's better to use a bike than a car. A bike doesn't use gasoline. You can do more on a bike and you can get exercise. That is why biking is better for the Earth.

Those are three things that can help the environment. Planting trees, picking up trash, and biking. Save our Earth.

Those are different things that you can do to save our Earth.
Happy Earth Day!:)
