

Earth Day

How did it start?

Earth Day began on April 22nd, 1970. It was invented because of the environmental activism in the 60's. It was invented to help bring awareness to environmental problems.

How can you help?

You can help by reducing, reusing, and recycling items you feel can be used again for other purposes. You can also help out organizations with planting or donating as a form of activism.

What is important to me with saving the Earth?

What is important to me and saving the Earth is what we are leaving for future generations. Right now, the Earth isn't in the best shape so its up to us to secure a safe Earth to live in.
