

# Earth day poem

Joshua Adaba: PS/IS 48

If you reduce, reuse and recycle there is a chance of better survival. Because we have to take care of the place we call home. I know it can be tough but you're not doing it alone. If we work together the world can be a better place. With a clean environment we can have a smiley face. Don't you all want the world to win. If you see a bottle of water throw it in the recycling bin. You can do it with your family you can do it with your friends. Just take care of our home so it doesn't have to end.
