

Have you ever heard of Earth Day? Well you probably heard of helping the Earth at least right? Well, anyway Earth Day is one of the great days of the year. It's the day when most of the stinkin, polluting humans stop polluting and actually help the Earth. Like:

to

More than 1 billion people try to help earth on Earth Day. I'm pretty sure almost everyone cares about animals and plants on Earth Day. Here are a few things you can do on Earth Day:

1. Clean up forests. 2. Plant saplings. 3. Plant food plants.

So anyway Earth Day is another great day because that's the day a youtuber called mr. beast plants 20 million trees out of 3.04 trillion trees in the world. I can tell mr.beast is a great guy. Also, and if you haven't guessed, one of my dreams is to stop all stinkin humans from polluting

Also, if you do NOTHING to help Earth, even on Earth Day is sit down on your couch doing nothing but eating potato chips and watching movies all day (no offense) but you're already just as bad as people who don't care for Earth. If you're already helping your great.

If you're rich you can do these things to help out earth.

1. Put Help Earth signs all around your city or neighborhood.
2. Use recyclable bags instead of plastic.
3. Just use reusable or recyclable things
4. Go to nature parks and forests and get rid of the garbage.
5. Plant food..... ok JUST PLANT STUFF IT'S GOOD FOR THE EARTHY OK?

## 6. Help out animals
