

Reduce, Reuse, Recycle!

By: Laya Thompson

Pollution!

oil, gas, and broken glass recycle your trash!

Throw out your core, it shouldn't seem like a chore,

so don't start to snore, buy less and reduce more.

It will help our marine life and land animals too.

So don't forget to reuse your trash and get rid of the plastic bag.

Be the hero in this story by picking up at least one peice of trash.
