

# *Trash Is So Much More Than Garbage, Reimagining It For A Better future*

*By* [Owen Edgett](#)

Recycling is beneficial for all. One reason recycling is beneficial, is because it keeps trash out of landfills. Recycling is also beneficial because if you recycle, the companies can use them to make other products, for instance many paper bags are made of recycled paper.

Trash can be made into things such as houses and offices. Another example is that we can make furniture. This keeps garbage out of landfills.

Trash can be made into fuel. By burning plastic at a very high temperature, We can make fuel out of plastic. Agilix is producing this type of oil and was the first to use it.
