

## Earthly Order

On a globe of deep blue,  
Is an island of waste.  
So much is askew  
Because of decisions made in haste.  
How did we get here? How can it be fought?  
The solution is clear:  
The three R's to be sought.  
Recycle to make new from old.  
Reuse, for a new purpose to be found!  
Reduce, we contribute less to the island foretold.  
These are the R's, three,  
The path to find the world clean.  
A world without litter on the streets.  
But to do this we need to be a team.
