

RECYCLING

Jason Escalante

When we Recycle our stuff we Reuse it. Do not just Throw it out in the trash bin. If it is a water bottle, you put it in a Recycling bin, not the trash bin. We can do it to help the Environment.

We have to stop making pollution in the air. We can do our parts to help the World and we can make new stuff out of old stuff.

We need to Recycle more and we can Make new stuff by using our imagination.

To help and do our part in the world and if you know someone that put a water bottle in the trash bin, please tell them to put it in the recycling bin.
