

Red and Blue

By Rachel Kubetz

Red and blue were in my shoe as I sat riding my canoe that was old but new. I made it using **cardboard** and bamboo.

While riding my canoe I used my **shoe** and some **bamboo** merged with **glue** to make something new. Then I flew to Kalamazoo where I went to the zoo.

I made something new in Kalamazoo. I made a new shoe for my old canoe out of some glue and **old plastic**, it was quite fantastic that old plastic. It was my future that old plastic and I will save to use it as a basket. This should be the future... reimagine reusing your belongings, don't just trash it!
