## SAVE THE EARTH

We have to save the earth. One day, Earth will die but we can make earth last longer if we help. One way we can help is by throwing trash away even if it's not yours. Another thing you can do is save the animals. Do not pick worms out of the ground. This may hurt them. If you see a worm out of the ground save it and put it back into the ground. Please make sure that you don't kill bees either. If you want to look at a bug or insect, just capture them and release them back to the wild. You can also plant some trees and flowers. The trees and flowers are beautiful to look at and also are very important. They give us the oxygen we need to help us live.
