

Save the Earth

By Leo

You don't need to do it everyday but it's good to take a day to do a lot of things for Earth. But guess what, you don't have to, it's called Earth Day. Earth day is a day to celebrate the Earth.

Gaylord Nelson the Senator of Wisconsin made Earth Day so everyone could take a day to plant trees, pick up garbage, and practically just help Earth. One of the activities is planting trees, like I already said, I am going to repeat a lot of things in this. This helps the Earth get strong and gives us air. You can also pick up trash around your town or city and that's one of the biggest problems on Earth, the garbage.

Earth Day isn't just for Earth. It helps us too. If our planet isn't healthy we aren't healthy. So get with the program.
