Ways we can protect and care for our home, Earth

I would recycle and separate plastic, paper/cartons, and glass by having different containers to make it easy. I don't leave the water running when I don't use it (shower, brushing teeth). I like to use reusable containers for food. Of course, turning off the lights and any electrical switches when not in use. But you maybe think why should we care well here are my reasons why you should care for the earth. Saving our earth and its environment becomes highly important as it provides us with food and water to sustain life. Our well-being solely depends on this planet it gives food and water to all living things to it is our responsibility to take care of it. And what can we do to keep the earth clean? Reduce, reuse, and recycle. Cut down on what you throw away Volunteer, Volunteer for cleanups in your community, Educate, Conserve water choose sustainable shop wisely, Use long-lasting light bulbs, and Plant a tree.
