Ways to take care of OUR Earth

There are many ways we can protect and care for our Earth. Keep reading if you want to know how to care and protect your earth.

- To start with, To take care of our earth and protect it we should use the 3 r recycle reduce and reuses that will help us take care of our earth. Next we should also buy less online because look all the things that bring if we order from online the box the plastic little bubbles that protect the items the plastic balloons almost all off us throw that in the trash and that can affect our earth because we are not recycling it or reducing it or reuses it. Also we should instead of buying something new that cost more money and you see someone throws the same thing you want then you should get it and reuses. Another thing you can do to help protect our earth and care is you should go on walks and pick up some trash or anytime you see trash on the street the beach water you should pick it up and recycle it. You can also pick up water bottles and recycle them and not only are you protecting our earth and caring for it you can also make some money off of that. Next, you should also reduce every time you leave the room or leave your house make sure you turn off every light. You can also take your own bags preferably reusable ones when you go to the grocery store. Last you can choose reusable travel cups instead of disposable paper or plastic cups.

As you can see, this is how me and you and the people on this earth help protect and care for OUR Earth. For example use the 3 rrr and you will be able to help our earth and care for it.
