

The Earth needs us. Cleaning the oceans to cleaning up pollution! Climate Change is a big problem! 3 degrees would destroy the earth. Trees are being taken down while we need them to to live. Using little help save animals and us, could be in trouble. Just die before doesn't mean ahead.

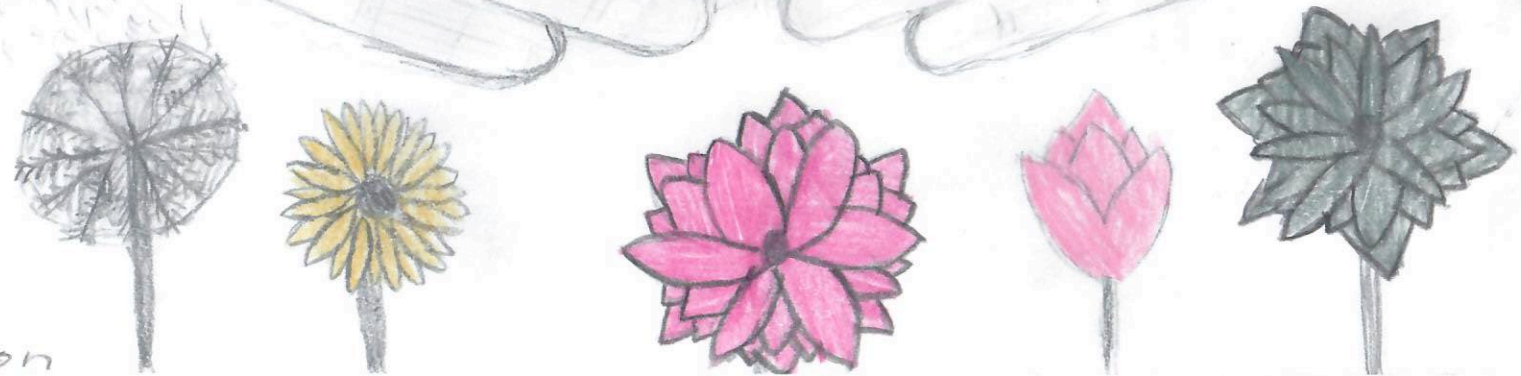

Dear year 2100, for all have brought you, From forest fires wish we could

water every day could The next generation because we might there aren't people

the trouble we it's time to apologize to air pollution, we have helped.

Thank you Earth, for all you have Done!

Dahlia Walston
