

Let's Rebirth The Earth  
Mark Filshtisky

Let's find a resolution for pollution  
and we have a warning for Global Warming  
and we need glaciers for our nature  
and Microplastics are drastic  
I blinked and the dinosaurs are extinct  
lets rebirth the earth  
and we know our world is supercalifragilisticexpialidocious  
and all of this is atrocious  
to fix the problems we have to not let gas pass to the sky why  
because when the gas goes high  
it'll make things dry  
so let's change things up yup and that's a wrap
