

Our Earth

Why are we so mean to Earth, our home?

People litter, pollute, destroy and harm the place where all humans roam

We trash it with garbage everywhere

We should show more care

We pollute the air, ocean, and trees

We also harm the animals, like buzzing, and helpful bees

People destroy land

But why?

For too much food, building more houses and roads, or for providing a useless supply?

To help we should throw away trash correctly, pollute less, and stand up for wrong things like deforestation

And have more consideration

Because we all know that our Earth is worth saving
