

Earth Day

Reeyant Acharya 5-216

We all know our planet needs help,
and people want to help,
but they can't get out
of their bad habits.

Saving our planet may seem big,
but everyone can do their part.

Like,
turning off the water,
when you don't need it.
Not using fossil fuels,
or using public transportation.
Using efficient light bulbs,
and so much more.

And if everyone does this,
every day,
then climate change will,
slow down.
