

# Little Blue DOT

BY Evelyn Toline

April 4th, 2022

We all live on this little blue dot,  
called earth.

Grant to us,  
Small to every where else.

Earth maybe the maker,  
but we are the care takers.

Without that small orb in a vast universe,  
we are nothing.

Like a tumbleweed to the wind,  
without the earth,  
we will never win.

At this game called life we've been gifted,  
we search and search until the fog has been lifted.

In our search for our origin,  
we are close to restarting again.

pollution, industrialization, war,  
and what is it all for?

As we get closer to our start,  
we are tearing each other apart.

As we create,  
we are also setting a date.

when eventually mother earth will have her revenge,  
we will all plead for a new end.

We can stop this,  
we have the power.

Everyone needs to contribute,  
so in the future there is no need for a death tribute.  
we need to break the cycle,  
and continue to recycle.

on that day we solve our little blue dot,  
we will have to worry not.

Recycle!!!
