

The Arctic Tundra

By
Room 4 UPK
New Beginnings Learning Academy

We love our Earth, it is our home!
There are so many areas for us to roam.
With so many biomes, the tundra is just one.
You'll see so much ice, and just a little bit of sun.

In the tundra the Arctic Tundra, the polar bears live!
In the tundra the cold, cold tundra, the penguins swim!

The Tundra is up near the North Pole.
The animals that live there, need to adapt to survive the cold.

In the tundra, the icy tundra the foxes play!
In the tundra the dry, dry tundra, the reindeer roam all day.

Over 50 different animals make the tundra their home!
Snowy owls fly high and low,
Not many plants have time to grow.

Pollution and climate change are hurting the tundra.
Please help us protect it!
Look around and see it's beauty,
This is why it is our duty.

We can reduce, reuse, and recycle, that is true!
Let's help save the tundra, me and you!
