

Earth Day

It's important to keep earth safe and it's important to protect earth.

Sometimes people litter and put garbage everywhere! It makes animals and people sick then they die. This is why you need to clean and protect earth and don't waste food. This

when you drink or eat something and your finished throw it in the garbage. And this is why you

need to save food or people will starve then they will get sick and die. This is why you need to protect and clean earth and it's important to save earth!
