

Recycling at Roosevelt High School

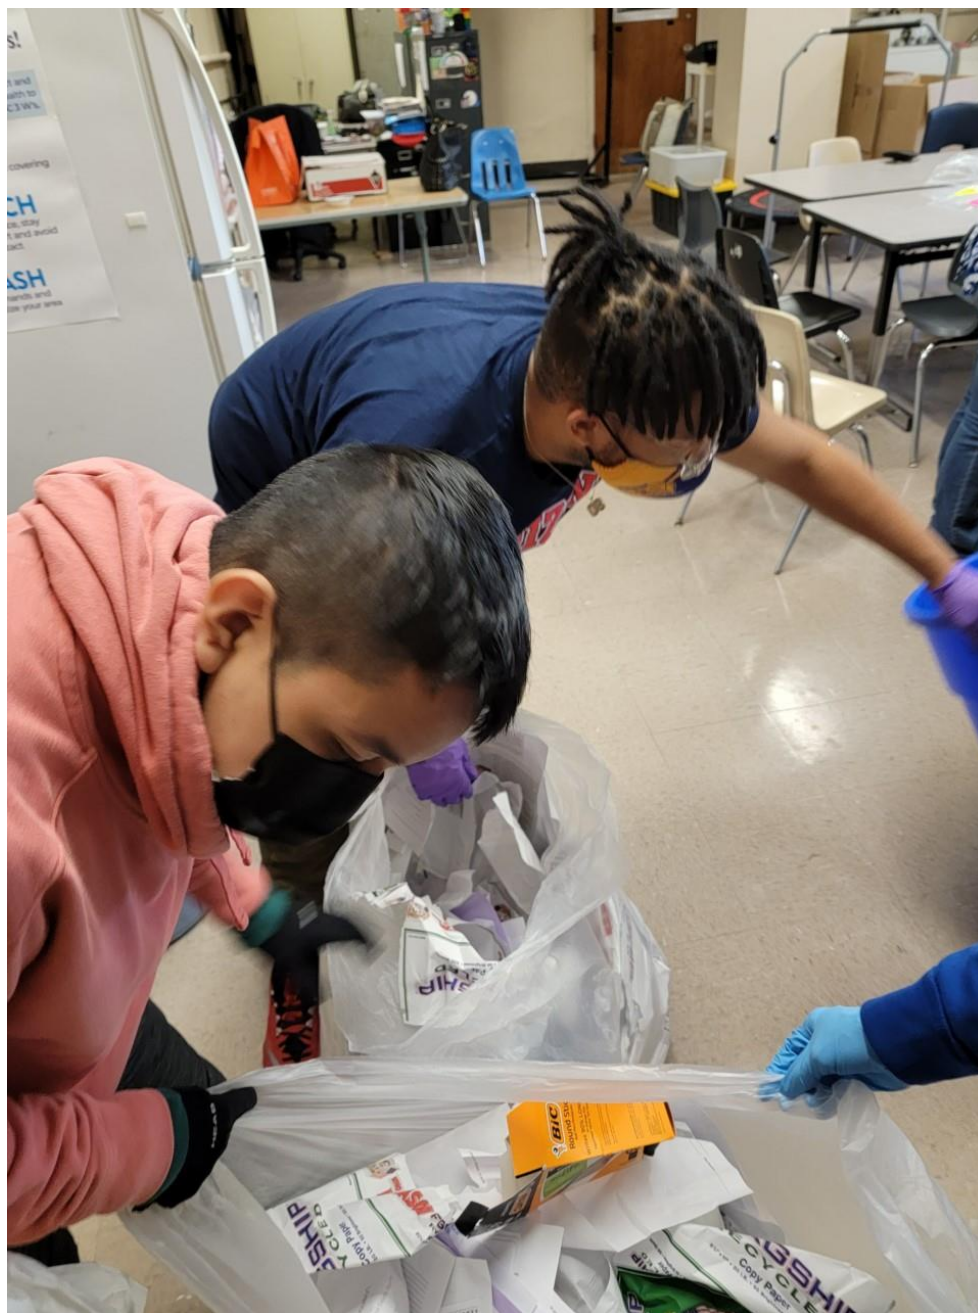

By Devan Eldridge

I first started recycling four year ago. I go to different classroom and ask the teachers if they have bottles and papers to recycle. Then, got to another class and ask for the same thing. I do this every Wednesday with Mr. Dmitry and Ms. Kara.

After, we collect the bottles we give to Ms. Cardillo at PAES Lab. When we go to PAES, we sort out the bottles and spread them out to separate plastic and glass ones. To sort the recycling, you must wear gloves and mask. Next, we take out the papers to get them outside to the garbage to be placed in boxes. Then, the recycling truck picks the recyclables.

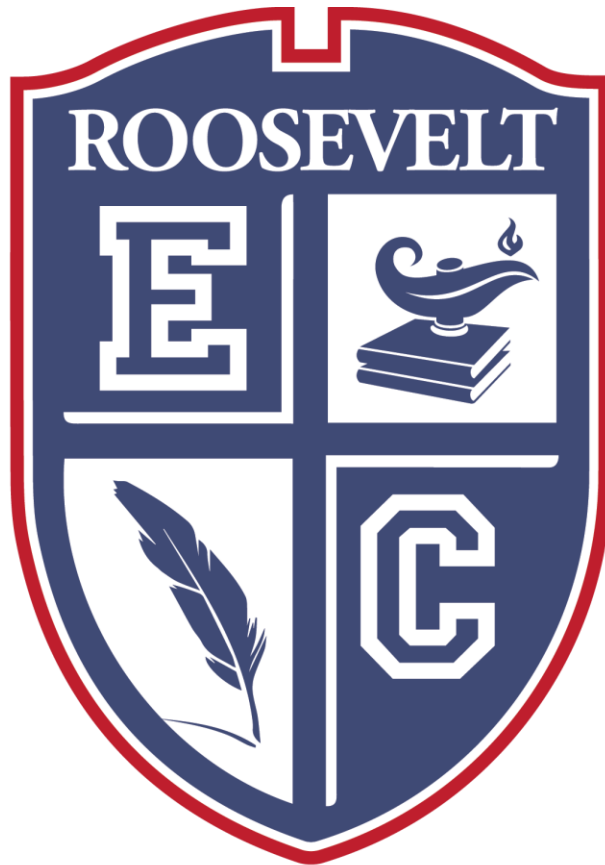

My favorite part of recycling is going to visit the different teachers in their classes because I like to say hi and be kind. When I finish going to people's classrooms I feel happy because I helped them.

I am learning to calm down and makes me feel relaxed because it makes me want to learn about recycling. I want to keep recycling every Wednesday here at Roosevelt High School.

Recycling is important because we can help earth to be happy. When we recycle, the garbage is neat and doesn't hurt the planet. I want to tell everyone to protect earth and recycle.
