Earth Day

It's important to keep the earth clean because if we don't keep the earth clean the animals will get sick.

The earth is our only home.

People will die and the earth will get sick and the earth will die if we don't clean the earth and clean the city and help the beach and the road. This is why we should keep the earth clean and not waste food and protect the water, people, plants and we should not litter.

We should clean the litter and pick up garbage and save the earth!

Keep the earth clean and make sure that the earth is healthy and safe! We should not litter and save the earth and do the right thing! Keep the earth clean and protect it.

This is why we should keep the earth clean because if we don't the people will get sick and animals will get sick and then the people will die and the animals will die! We should make sure the earth is clean and is healthy.
