Earth day is a special day because every year on the 22 of April, around 1 billion individuals across more than 190 countries take action to raise awareness of the climate crisis and bring about behavioural change. On earth day we don't throw trash on the roads or on the streets we clean the earth by picking up the trash and also cleaning beaches where there is more trash than on the streets. People should not litter it is not good for the earth. Everyone needs to take care of our Earth.

March/15/23

The Earth is not a garbage can,
We can't throw out our garbage,
If you want to do it better,
Try to do this thing together,
Collect the garbage from the fields,
Take care of the pets,
Ask your friends and siblings,
To do the earth more happier
and do it more lovelier.
