

Earth Day Every Day

Let's make Earth Day every day! Here are some ways you can help better our planet every day; don't litter, recycle, and protect our ecosystem.

One way to celebrate Earth Day is that we can stop littering. People can stop throwing trash on the streets instead we can throw trash in the garbage can. Next, we can tell people to pick up trash from the streets when they see it. Lastly, animals can eat the trash and get very sick and even die.

Another way we can celebrate Earth day is to recycle. One way we can recycle is to pick up cans from the streets and put the cans in a recycling bin. Next, people can put batteries in recycling bins so we can reuse them. Lastly, we can put cans, plastic, and glass in the recycling bin.

Lastly, we can celebrate Earth day to protect our ecosystem. One way we can protect our ecosystem is to plant trees, flowers, and food. People can balance cutting down trees by only cutting down trees when needed. If people need to remove trees then we should plant trees somewhere else to restore the balance. Lastly, only take what you need. People should follow laws regarding fishing and hunting.

Those are some ways we can make Earth Day every day! Some ways you can. Is to not litter, recycle, and protect our Ecosystem.
