

**WAYS WE CAN MAKE EVERY DAY
EARTH DAY!**

Everyone is responsible for our beautiful planet Earth! It is our only home! One way we can take care of the Earth every day is by recycling paper and plastic items. When we recycle we can make something new. This reduces waste.

The second way we can make Earth day every day is by not polluting. One way you can do this is by throwing your garbage in the trash can. You can even clean up a park or beach by throwing garbage in the trash. This helps keep Earth clean and it also helps animals stay healthy.

The third way we can make every day Earth day is by turning off lights when we are not in that room. This helps the Earth because this saves energy.

In conclusion, these three things help make Earth day every day because it keeps Earth a beautiful place. Let's work together to help the Earth!
