Earth day is a day that we celebrate for our beautiful planet earth. Earth is a nice place, but we all need to do many things to keep it this way. One thing to do to keep our planet this way is by recycling. Recycling will help us keep our planet clean. It also prevents the emissions of many greenhouse gases and water pollutants and saves energy. Another way to help clean our planet is to volunteer in cleanups in your community. This could help earth from all our littering and pollution. This will also allow you to connect with your community and make it a better place. The last and final way to help our earth is too not litter. Littering is bad for the environment because it endangers animals, our wildlife, and the economy. Littering also pollutes our neighborhood and decreases property values and destroys city's natural beauty. These are ways that you can help and keep our beautiful planet Earth clean and the way it is today.
