

Earth Day Every Day

We all know Earth Day is important but I think Earth Day should be more than one day, it should be every day! Some ways to make Earth Day, every day, are Don't waste, take only what you need, Protect the Ecosystems, And don't Litter.

One way to celebrate Earth Day is not to waste and take only what you need. People should have limits on how much food, water, and how much trees they cut down, and how much gas you use. People should not waste their food, water, and their money. People should always take what they need and not what they want. It's important to have stuff you need.

Another way to celebrate Earth Day every day is to protect the Ecosystem. People should play outside and not use electronics. People should not put trash on streets, ocean, they go in the trash can. And don't put gas in the air and chemicals in the air so people don't get sick and the air would get dirty. People should pick up the trash on street or beaches because it's important you keep the world clean.

The last way to celebrate Earth Day is to not litter on the street or the beaches. People should pick up the trash and not put trash on the streets, beaches so the air is clean. People should put trash in the trash cans where it belongs. People should not put the trash in the ocean so the sealife don't eat the trash.

That's how to celebrate Earth Day, every day. There are 3 ways to make Earth Day, every day, are Don't waste, take only what you need, Protect the ecosystem, And don't Litter.
