

Everyday is Earth Day!

Skyler Do

Everyday should be earth day!
But many actions stop our environment from turning into its best.
It is our responsibility to make it go away!
In order to achieve our goal we should go on with our quest.
You can support our world in every way.

Maybe you could clean up after yourself.
Possibly after others too.
We should take care of the earth's health.
Because littering is a problem that affects the outside and also you.

It would be a big help if you were careful when you shopped.
Choosing wisely matters to many.
Our waste would go to a landfill where everything is dropped.
But if we bought items that we use plenty.
Our terrible waste problem would be reduced by twenty.

Or maybe you could help plant more trees.
Many disappeared due to houses, factories and towns.
Possibly that would make us finally believe.
Our generous actions to save the planet could help wipe off all the frowns.

At the end everyone who chipped in would be the heroes.
Everything we did would be worth it.
We would be able to sleep on a shining pillow.
Dreaming of how all we did perfectly fit.

We could have our imagination turn into reality.
A small step may seem tiny but really it would be a big leap.
