

Make Everyday Earth Day

We celebrate Earth Day to honor the achievements made by environmental movements & to raise awareness for our Earth. A day to take care of our earth and be environmentally cautious. But we don't only have to do this on Earth Day. We should be taking care of our planet all the time. But how can we make Earth Day everyday?

We Can:

SAVE

ELECTRICITY

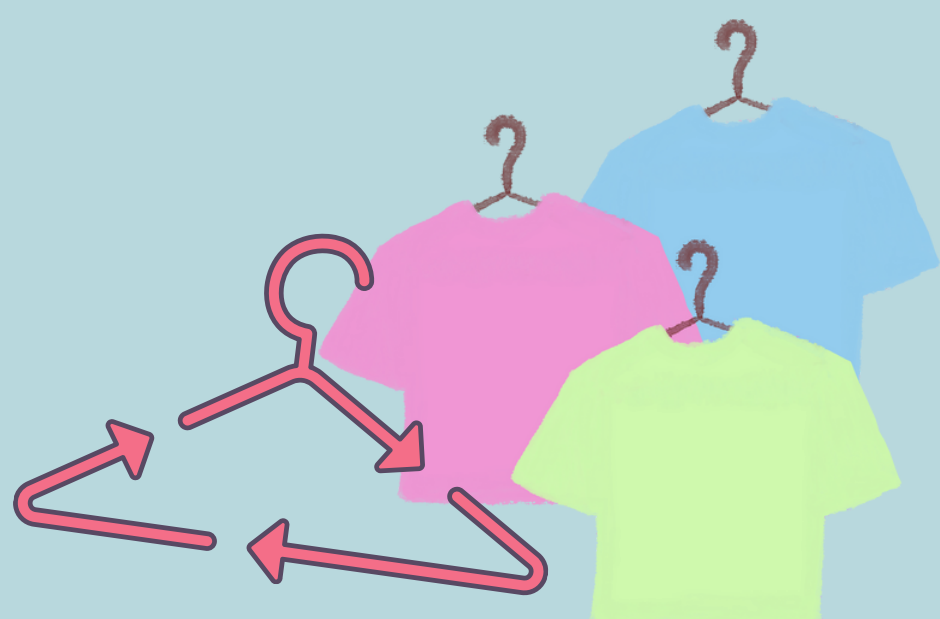

turn off lights in the house when we aren't using them

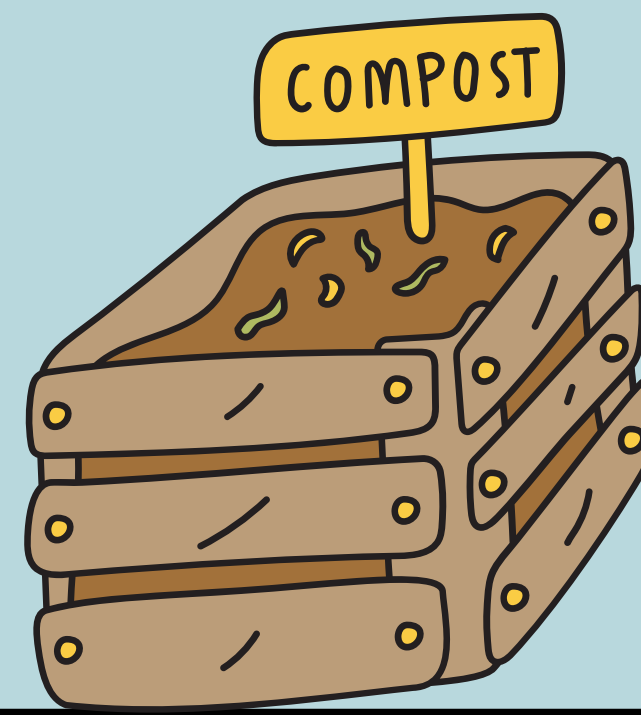

reuse bags when going to store

use the internet instead of wasting paper for emails or art

shop sustainably instead of using fast fashion if you can afford it

give away certain garbage to gardeners to be used as compost
