Earth Day Every Day

We all know Earth Day is important but I think Earth Day should be more than a day. It should be EVERYDAY! People should not litter, they should save water, and not use dangerous chemicals.

One way you can save Earth Day by not littering. It kills sea animals if you litter in the ocean, another way is if you litter on the streets cars will drive on in and they might crash or break a tire, and the **last** way you can stop littering is by throwing your garbage in the trash don't throw it in the recycle.

Another way to make Earth Day everyday is to turn off the faucet while brushing your teeth, you can also preserve that water, and finally you can make sure you don't leave any water on.

The last way you could make Earth Day every day is if you use dangerous chemicals it would cause pollution, it will destroy the ozone layer, and finally it could hurt living things.

In conclusion Earth Day should be everyday because you have to keep the world safe if you don't you won't.
