### Earth Day Every Day

We all know Earth Day is important but I think Earth Day should be more than a day, it should be everyday! Earth should be celebrated every day. Some ways we can do this is by conserving water , not littering , and by reducing and reusing.

One way to celebrate Earth day every day is not to litter. If you litter on the beach the tide might take it in the ocean and ocean animals might eat it and die. Don't litter, make sure to put all your garbage in a trash can.

Another way to celebrate Earth day everyday is by conserving water. Conserve water and you could have more of it. If we waste ocean water the ocean animals will lose more and more of their home.

Lastly, people can help make earth day everyday by reducing and reusing. If you start reducing and reusing natural resources there will be more for everyone else in the world. You should reduce and reduce because would you want to live a bad future by not reusing and reducing or a good future with a healthy environment by reusing and reducing.

In conclusion, Earth day should be every day. Earth should be celebrated every day. Some ways we can do this is by conserving water, not littering, and by reducing and reusing.
