Earth day Every day

We all know Earth day is an important Day but I think Earth day should be more than a day. It should be every day! Here are some ways you can save the earth; limit electricity, recycle and use less gas.

One way to celebrate Earth day is to limit electricity. You can turn off the stuff you use after you're done with it. Don't use that much electronics. Don't be on your electronics all the time if you don't need to.

Another way to celebrate Earth day every day is to recycle. Don't throw batteries in the recycle bin, you can save it. Put bottles in the recycle bin and not the garbage bin. Pick up bottles laying in the ocean and bring them to the nearest recycling bin.

The last way to celebrate Earth day every day is don't litter. Pick up trash that is laying on the ground and on the floor. Don't throw trash on the ground because it can get into our sewers and water ways.

clean up trash.

To make earth day every day is to limit electricity,recycle and don't litter. One way to use less gas is to turn off the engine when you're done. Another reason to use less gas is to not drive a lot if you don't need to and just use it to go to a house,work or get food. Last reason is to not use the ac to much.
