A WAY WE CAN MAKE EVERYDAY EARTHDAY

Recycle

One Way we can make earth day every single day is by recycling. Recycling everything can help reduce pollution and waste that goes on land and water. Recycling could help people have responsibility, have more available jobs, save energy , and greenhouse gases. This are some of the reason why people should recycle.

Littering

- Another way we can make it be earth day everyday is by not littering. Littering damage , kills or stunt plant growth. Also, 40% of the litter is also burn in the open air which release chemical. Littering also harms animal because some of the littering is also thrown in the ocean which animals can choke or die from this, By not littering we can clear the air. This are some reason why people shouldn't litter.
