

Earth Day Every Day

Some ways to make Earth day everyday is to recycle, protect the ecosystem, and turn off the lights when you leave the room.

One way to celebrate earth day is to recycle. You see, sometimes we forget to recycle. There are lots of ways to recycle. Like we could pick up all the trash in a certain area like the park. Or we can't be wasteful like you could make an old thing into a new thing like a tire can be a swing or 2 cups can be drums. We call that reduction. And put trash in the correct bin.

Another way to celebrate earth day everyday is to protect the ecosystem. Like to make sure the habitats and the animals are safe. Sure we could cut down just a few trees but only because we need their resources like paper and wood. Another way to protect the ecosystem is to not kill animals like hunting animals are making them endangered. I mean sure we need animals for good uses. Like we need animal fur for the clothes we wear. And animal meat for us to eat, but maybe we could be vegans which are people who don't eat meat. If you still like meat that's fine but only eat it once in a while.

Another way to celebrate earth day everyday is to turn off the lights when you leave the room. Some people might not know that if you don't shut off the lights in the room there's 2 things. 1 You're wasting electricity which is bad for the environment. 2 All the time the light is on goes into your electricity bill so you could also lose money. Besides you got the sun, and the sun makes light in the room you're in if you have a window. So a good way to make earth day everyday is by turning off the lights when you leave the house or room.

You can do a lot of things to make earth day everyday. These are just the things i wrote down but some i didn't even write down. But if you do some of these things in real life you're not just doing the right thing but you're also making the world a better place. By taking care of it.

In conclusion, when we can recycle, protect the ecosystem, and turn off the lights when you leave the room we can make our world a better, cleaner and perfect world.
