Thankful essay by Aidan Kelly

My essay is about my family, friends and school. These are the things that I am thankful for. God has blessed me with a family that loves and takes good care of me. My friends are a blessing. We play and talk together. I am fortunate to go to a school. I am learning about many things and feel safe.

I am thankful for my school. Here I am learning and getting smarter. I am learning about books and science, and my favorite subject math. It is fun to multiply.

I am thankful for my family because they always make me happy. We go on roller coasters, watch movies and eat food together. Sometimes they surprise me at home with a special dessert after dinner. They buy me warm clothes and take care of me when I am sick.

My friends are special. I feel thankful for them. We talk and play fun games. They make me laugh and we go to each others parties. We get together after school and have fun playing Nintendo and tag.

I am a very lucky person. God has given me family, friends and a good school. I hope other kids are blessed with these things too.
