

*What am I thankful for this year?*

This year I am thankful for living another year because I get to spend more time with my awesome family, friends, and teachers. My family is wonderful because I have two loving parents (most of the time) and a funny sister (because she acts a kind of strange). My friends are amazing because they are smart and nice. My teachers are incredible because they do interesting activities with the class and teach us mind blowing things. They also are very kind to me, my classmates and my family.

Other things I am thankful for are technology, food and water, and a home. I am thankful for a home because I need a place to store food, water, and technology. I am grateful for technology because I use it every day. I appreciate food and water because I am lucky enough to have a family that can afford it. These are all the things I am thankful for.
