

PS 209
Class 6-2

Yahya Hussain

Thankful

We people are thankful for almost nothing
Even if we are
We never get to say it in this short period of life
Some feel shy
Some people feel the other person should know by themselves.

I am thankful for being a normal human
About 3.5 million people become paralyzed every year
Millions of babies are borned with abnormalities.

Be happy that you are breathing
Be happy that you are alive
Be happy that you can see, walk and talk
Be happy for everything.

Lastly, I would like to say
See your abilities from the person's eye that doesn't have those abilities.
