

Thankfulness

Calleigh

I am going to be telling you what I am thankful for. It is a couple things I will be telling you about today. Only a couple things though because if I were to tell everything this would be going on forever. Literally it would be going on forever. I hope you are thankful for a couple things too. That wouldn't be very good if you weren't.

The first thing I am thankful for is this school and all the things inside it and my teachers. I am thankful for this school because if we didn't have this school I wouldn't be going to school with all my friends and teachers. Also I wouldn't get to do all the fun things that we in all my classes. Like I probably wouldn't get to do spheros in computers. Or do all the fun things that we do in art class. Last but not least I wouldn't get to be in my mom's class.

The second thing I am thankful for are my friends. I am so glad that I have the friends I do. Although they can be a little weird sometimes they are still the best friends I could ever have. I have many best friends, but I have one best best friend. I have known her forever. My mom and her mom were even best friends when they were little. They still are best friends.

The third thing I am thankful for is my family. They are the best. I love them so much. I am especially thankful for my mom because she is my teacher, my mom. She does get a little mad every once in a while, but I know she still loves me.
