

NAME: Talya Suleiman

One thing I'm thankful for this year is good health. With the spread of the coronavirus, and now the flu season taking hold, good health is more important than ever. I feel that I am very very lucky to have good health because then I can stay safe from the coronavirus and the flu. I am also thankful for good health because then my friends and family can stay safe too. Without good health, I wouldn't be able to stay safe. That's why I am very thankful for good health.
