

Thankful Essay

By: DellaRae Dayton

What would your life be like if you had no fun time with people you love? I am thankful for many different things. I am thankful for my family and friends, outdoors, and school.

One thing I am thankful for is my family and friends. For example, my BFF Charley is so much fun to hang out with so that I don't have to worry about getting bored. Also, my cousin Viviana is very kind and loves to talk with me and I don't get lonely.

Another thing that I'm thankful for is the outdoors. For instance, the weather outside is so nice and warm in the summer. I can have friends over for pool parties! Another reason is, I love to camp out with my family and friends. Me and them can have fun time together, free time, and no homework!

The final thing that I'm thankful for is school. One example is, school did not shut down this year because of covid. This means I don't have to worry about computer glitches! Another example is, I have great friends and a wonderful teacher that I can hang out with and laugh with!

As you can see there are many things that I am thankful for such as my family and friends, outdoors, and school. If I was not thankful for any of these things I would probably be living a very lonely, bored, and gloomy life.
