

NAME: Tyler

I am thankful for the food that I have, because without, I would'nt be here to discuss it. I have a full meal, yummy desserts, and delicious snacks. I am really thankful for my snacks. Also, I am super duper thakful for Ice cream, Tacos, and Choclate. Especially Choclate Taco shells with Ice cream inside. I am also grateful for the healthey food I have too, that keeps me strong.

I am also very happy for the amazing creation of air conditioning. It is so helpful in the summer days, when you just want to relax inside. It keeps you nice and cool, and before it was invented, you just had to sweat to death. I definitely do not want to do that. I also am thankful for pools, who also keep me cool during the summer months. If only I had my own.....

And of course, I am extra thankful for imagination. Without it, nothing would have ever been possible. It also helps me when I want to play, because I can be creative and tell a story. And when I read a book, I know the author had to have an imagination to make it for us. And movies and video games would never be created if there was no imagination in the world. Without imagination, the world would be a very dull place. I am so thankful for all of this, because it makes the world a better place.
